

NPDES
FORM
6100-28UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON, DC 20460
ANNUAL REPORT FOR STORMWATER DISCHARGES ASSOCIATED WITH
INDUSTRIAL ACTIVITY UNDER THE NPDES MULTI-SECTOR GENERAL
PERMITFORM
Approved OMB No.
2040-0004

Permit Information

Report Year: 2018NPDES ID: MAR054014

Facility Information

Facility Name: BOSTON CONCRETE CORPORATION

Facility Point of Contact

First Name Middle Initial Last Name: Dave ThebeargePhone: 978-937-7222

Ext.:

Email: dthebearge@bostonconcrete.com

Facility Mailing Address

Address Line 1: 706 BROADWAY STREET

Address Line 2:

City: LOWELLZIP/Postal Code: 01854State: MACounty or Similar Division: MIDDLESEX

General Findings

Provide a summary of your past year's routine facility inspection documentation (see Part 3.1.2 of the permit). In addition, if you are an operator of an airport facility (Sector S) that is subject to the airport effluent limitations guidelines, and are complying with the MSGP Part 8.S.8.1 effluent limitation through the use of non-urea-containing deicers, provide a statement certifying that you do not use pavement deicers containing urea (e.g., "Urea was not used at [name of airport] for pavement deicing in the past year and will also not be used in 2015." (Note: Operators of airport facilities that are complying with Part 8.S.8.1 by meeting the numeric effluent limitation for ammonia do not need to include this statement.)

During 2018, all quarterly routine facility inspections occurred in accordance with Part 3.1.2 of the permit by the Operations Manager, a SWPPP Team member. All potential pollutant sources, industrial activity areas, and control measures subject to storm water exposure were found to be adequate with best management practices such as replacing filter socks and pavement sweeping noted as needing improvements.

Provide a summary of your past year's quarterly visual assessment documentation (see Part 3.2.2 of the permit).

Quarterly visual assessments occurred as required and most commonly noted were: light brown/grey color; no odor; hazy/cloudy clarity; no foam; no oil. Trace or fine silt was often noted for settled and suspended solids. Once, floating solids was noted.

For any four-sample (minimum) average benchmark monitoring exceedance, if after reviewing the selection, design, installation, and implementation of your control measures and considering whether any modifications are necessary to meet the effluent limits in the permit, you determine that no further pollutant reductions are technologically available and economically practicable and achievable in light of best industry practice, provide your rationale for why you believe no further reductions are achievable (see Part 6.2.1.2 of the permit). Enter "NA" if not applicable.

NA

Provide a summary of your past year's corrective action documentation (See Part 4.4 of the permit). (Note: If corrective action is not yet completed at the time of submission of this annual report, you must describe the status of any outstanding corrective action(s).) Also describe any incidents of noncompliance in the past year or currently ongoing, or if none, provide a statement that you are in compliance with the permit.

The installation of a catchbasin at the outfall remains to be the corrective action. Immediate actions such as pavement sweeping and use of filter socks are ongoing. Benchmark and annual effluent limitations have been exceeded each quarter.

Certification Information

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I have no personal knowledge that the information submitted is other than true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.
